### Project details.

#### Durgapur:

Durgapur is the third largest urban agglomeration in West Bengal and happens to be the second planned city of India after Chandigarh. The only operational dry (inland) port in Eastern India is situated here. Durgapur is by far the most industrialized city in eastern India. It started with the first prime minister of independent India, Jawaharlal Nehru.

Durgapur is one of the key industrial destinations of the State of West Bengal. The excellent geographical location is one of its major advantages to attract Business Entrepreneurs/ Industrialists for making investment of their capitals. Due to the rapid urbanisation of the region, ADDA has taken initiatives to improve the basic infrastructure like road, water supply, sewerage, drainage etc.

Major Industries like Durgapur Steel Plant (SAIL), Alloy Steel Plants, Durgapur Projects Limited, Phillips Carbon Black Ltd, Graphite India Limited, Durgapur Chemicals, Stollberg India Pvt. Ltd., Supreme Industries Ltd., Allied ICD Services Ltd., Dinman Polypack Pvt. Ltd. etc have well established within the region of Durgapur Planning Area. Durgapur also emerged as Medical Hub encompassing several multi-speciality Hospitals.

ADDA has also focused in bringing about investment in the non-traditional sector of I.T. and I.T. enabled services, housing and retail through its public private partnership ventures. There has also been a focus on institution building, especially in the education sector. A number of new schools and professional colleges in the fields of Law, Management, Hotel Management, Engineering etc have come up in the city of Durgapur.

Asansol Durgapur Development Authority in short, "ADDA" has developed excellent infrastructure for smooth and efficient water supply to the established and developing industries in different sectors and common people of Durgapur. Durgapur Water Supply Project has series of network having Water Treatment Plants (WTP), 14 MGD and 15 MGD capacity at Angadpur, reservoir and boosting station at Piyala.

Sufficient water supply network with reservoirs, pump houses and pipeline network have already been created. The details are:-

- Existing 14 MGD & 15 MGD WTP: It consists of intake pit, intake well, intake channels, raw water pump house, chemical house, flash mixers, clariflocculators, elevated storage reservoir, filter house, clear water reservoir, sludge pump, sludge ponds, laboratory and electrical sub stations etc.
- Other associated infrastructure like electrical substations, water boosting facility etc.

The raw water drawn from the river Damodar at Angadpur is treated at the WTPs after which it is pumped to boosting station at Piyala. Then the water is pumped at Piyala to Bidhannagar & EPIP and distributed to different industrial, commercial and residential zone within Durgapur Planning Area. Presently, on an average 16 MGD of water is being supplied to the different consumers within Durgapur.

## **Mangapur Industrial Cluster:**

ADDA has set up an industrial area in Mangalpur where many number of small and medium scale industries are operational. Mangalpur has catered several industries such as OCL Ltd, Reshmi Cement, ABB Ltd, Amrit Cement Industries Ltd, Shyam SEL Ltd.(Power Division), Shyam metalics Pvt. Ltd., to furnish top-notch facilities to export oriented industries in this region. Jai Balaji Industries Limited, has a sponge iron manufacturing unit with a capacity of 105,000 tonnes per annum at Mangalpur Industrial Estate.

## **Bulk consumers of MANGALPUR INDUSTRIAL CLUSTER**

**Requisition of Financial Bid from empanelled firms for the proposed PPP Project:- Operation and Maintenance, Up-gradation and Management of Water Supply Facilities within Durgapur Planning Area and Mangalpur Industrial Estate within Asansol Durgapur Development Authority.**

Considering the present demand, this project can cater to the future demand at least for the next 20 years. ADDA and DMC are also committed to augment the water supply system in order to the need of different categories of consumers.

Since water supply is a basic utility service, efficient operation and maintenance, up-gradation and management is required. In addition, considerable revenue shall have to be generated by ADDA/DMC from the said projects for undertaking development activities within the planning area. Hence, a competent agency shall have to be appointed through PPP Mode so that water supply project is efficiently handled and considerable revenue is generated for ADDA/DMC. However, before undertaking the process of transparent bidding process to select a competent agency, the authority desires to prepare Detailed Project Report covering all the physical and financial parameters for sustainable and efficient operation, maintenance, up-gradation and management of the Water Supply Project. Transaction Advisor will assist the Authority in preparing the DPR, selecting the competent agency/ firm and signing agreement for the water supply projects.
